Partenaires du projet:

NIEUWE WEGEN IN ZORGCOMMUNICATIE

«Goed geïnformeerd»
In de toekomst zal een zorg-app toegang tot en uitwisseling van informatie verschaffen in de thuiszorg, en dit tussen alle betrokkenen van het zorgproces.

«Ik zie wat jij ziet»
Augmented reality brillen en specifieke smartphone apps verbinden de 'echte' wereld met de virtuele wereld. Een ZorgExpertenCentrum gebruikt deze technologie om de hulpverleners te helpen in moeilijke situaties ter plaatse.
